

This is respectfully being return in order to give my opinion on the issue regarding the denial of permitting XM radio from providing "traffic and weather" information to myself all other subscribers. I am sure there are many different reasons as to why people are subscribing and "paying for radio services", somethign that we can all get for free no matter what city/state we are from. My reasons deal with the amount and various different kinds of entertainment that is being offerred to me as a subscriber. Having a constant channel giving constant local traffic & weather reports would be GREAT! Why should the NAB have any say as to what can and cannot be offered to XM listeners?I ask you to seriously consider rejecting NAB's petition #04-160. Local radio would never be able to come close as to the coverage that is offered/given in the XM weather and traffic channels and they want to regulate what can be heard by paying customers? What sense does that make?

They have not yet even given me the channel for my home area, but I sure used it whil on vacation in the north part of Florida, adn since that day on I check my XM reciever to see if the Miami channel is being offerred.

I thank you for your time and for allowing myself and all other concerned XM subscribers to practice our First Ammendment Right on voicing our opposition on this issue.

Reject the NAB's petition 04-160
